Leading, Efficient & Optimal

Leo Backup is a Windows backup software designed to prevent data loss by automatically copying your data to various locations. The software supports secure data transfer protocols and provides extended access policy for right data management.

Security

- Secure protocols support (SFTP and FTP/SSL)
- Private / Public Key authorization
- File encryption
- User Interface Password

Corporate Usage

- Active Directory impersonation
- Special scripting (COM support)
- Unlimited Backup Sets
- Custom builds

Automatic Backup

- Service mode support
- Flexible scheduler
- Programs/process conjunction
- Notification service

Special Backup Management

- Timestamps
- File filtering
- File compression
- Registry Backup

SECURITY

1. SFTP and FTP SSL/ TLS
Thanks to secure protocols you can avoid any data intercepting. Both protocols encrypt the passwords and files before transferring, guaranteeing your files remain totally intact.

2. PRIVATE / PUBLIC KEY AUTHORIZATION
You can rule the access to your data by generating certain restrictions. Secure authorization methods allow the backup requests only after the credentials have been checked, so your data and your network are inviolable.

3. FILE ENCRYPTION
Blowfish's security has been extensively tested and proven world-wide. Apply the Blowfish encryption to ensure your backup and that no one but you is able to access your data.

4. USER INTERFACE PASSWORD PROTECTION
Set your password on the program launch and no one except you would be able to manage the backup data and its locations.

CORPORATE USAGE

1. ACTIVE DIRECTORY IMPERSONATION
You can manage the backup cooperation through the domains systems: our program provides you with flexible arrangement of the company accounts credentials.

2. SPECIAL SCRIPTING (COM SUPPORT)
You can adjust the program functionality to the particular company policy. It's a useful interactivity with the software according to your company rules.

3. UNLIMITED BACKUP SETS
You can create and manage any amount of backup sets. The program has no limitation with data maintenance, so you can easily categorize your files properly and create as many sets as you need to.

4. CUSTOM VERSIONS
We provide customized builds of Leo Backup branded for specific companies' requirements at a special price. We consider all types of customization from minor logo changes to new features implementation.

AUTOMATIC BACKUP

1. SERVICE MODE SUPPORT
Your backup job is processed even if another user connects to the system at that moment or when no one is logged on. This is particularly suitable for your scheduled tasks to be executed even when you are offline and also for backing up the stand alone servers.

2. FLEXIBLE SCHEDULER
Define the proper plan and run the backup / restore automatically. Just set the program and Leo Backup will perform it accordingly.

3. PROGRAM/PROCESS CONJUNCTION
Combine your backup process with your commonly used programs' functionality. Specify the proper executable file and this program will be launched according to the backup running: before or after it.

4. REPORTING SERVICE
You are always notified of the backup results by e-mail message. Moreover, you can receive the detailed log about the performed operation.

SPECIAL BACKUP MANAGEMENT

1. TIMESTAMPS
Mark the particular folder of your backed up files to avoid the large data accumulation and tangled assortment of files and folders.

2. COMPRESSION
To preserve your storage space you can apply ZIP compression for your backups. Thanks to standard ZIP technology you can restore the backed up files manually, using any zip-compatible utility.

3. FILTERING
If you need to add only some particular types of files data in your backup job, just mark it. Want to exclude some file extensions? Do it by one click.

4. REGISTRY BACKUP
The registry stores the data in a strict structured hierarchy of keys, subkeys and named values, so you have to be very careful with Registry editing. Entrust it to Leo Backup : it gives you the one-click option to reliably back up your Registry files.
